

CÉSAR MÉNDEZ CASTRO

JUNIOR FULL STACK DEVELOPER · BACKEND

(+34) 648 241 990 | cesarmencas19@gmail.com

[LinkedIn](#) | [GitHub](#) · [TsCesar](#) | León, Spain

PROFESSIONAL PROFILE

IT Technician at Proconsi, a software and IT consulting company in Leon, Spain, providing application support for enterprise business software — troubleshooting and resolving technical issues, maintaining application functionality, and working daily with SQL and DBF databases, including writing scripts, correcting records, and validating data — alongside remote and on-site customer support. Currently completing a Master's Degree in Full Stack Web Development at ConquerBlocks, with certifications in HTML5, advanced CSS, SQL, and SOLID design principles, in addition to a Higher Technician qualification in Multi-Platform Application Development (DAM). Built a Java web application for database management on personal initiative, using JDBC and Hibernate with MySQL and SQLite, alongside several projects published on GitHub. Brings over two years of steady experience in administrative and customer-facing roles, having developed strong organizational skills, reliability, and communication. A junior developer with genuine hands-on experience, ready to contribute to a development team as a Programmer, Java Developer, Backend Developer, or Software Engineer.

PROFESSIONAL EXPERIENCE

Application Support Technician — Proconsi

Jul. 2026 — Present

León, Spain · Full-time · On-site

- Provide technical support and resolve incidents on enterprise business software, including error diagnosis and direct customer assistance, both remote and on-site.
- Maintain application functionality and analyze incidents, working with clients to validate implemented solutions.
- Maintain and update SQL and DBF databases, correcting records and validating data to ensure accuracy.
- Write and execute SQL scripts for data insertion and maintenance, working daily with enterprise business databases.

Administrative Assistant (Internship) — Vexiza

Mar. 2024 — Jun. 2024

León, Spain · On-site

- Managed company accounting and processed payroll.
- Designed a fixed and variable cost tracking spreadsheet as an internal process improvement tool.

Waiter — Las Marys CB

Apr. 2026 — Present

León, Spain · Part-time · On-site

- Part-time customer service role, balanced alongside studies and the position at Proconsi.

Delivery Driver — Telepizza

Jan. 2024 — Apr. 2026 (2 years and 4 months)

León, Spain · Part-time · On-site

- Combined studies with a part-time role for over two years, building efficiency, organization, and teamwork skills under tight delivery deadlines.

Administrative Assistant — Telephone Operator — Adecco (Repsol campaign)

Dec. 2023 (1 month)

León, Spain · Part-time · On-site

- Provided phone-based customer service for Repsol, resolving customer inquiries and issues.

EDUCATION

Master's Degree in Full Stack Web Development

Jun. 2024 — Present

Intensive program covering full web application development (frontend, backend, databases, and best practices).

Higher Technician in Multi-Platform Application Development (DAM)

Sept. 2024 — Jun. 2026

Qualification completed.

Vocational Training (Mid-Level) — Business Administration and Management

Sept. 2022 — Jun. 2024

Final grade: 8.33/10. Completed an internship at Vexiza as an administrative assistant.

PROJECTS

Database Manager — Java Web Application

- Personal project: a Java web application for database management, featuring a dedicated data access layer built with JDBC and Hibernate, supporting both MySQL and SQLite.

Tetris

- Built a complete recreation of the classic Tetris game in Python, applying object-oriented design, data structures for board management, collision detection, and a scoring system. [Repository →](#)

ArcadePong

- Developed an arcade-style ping-pong game in Python, implementing the game loop, collision detection, and event handling through object-oriented programming. [Repository →](#)

Texto_a_voz.py

- Python script that converts text into playable audio using text-to-speech libraries. [Repository →](#)

Spa-beauty

- Designed the layout for a beauty salon website, using CSS to build a polished, responsive interface. [Repository →](#)

DAM2

- Repository of Java exercises and solutions developed during the DAM program. [Repository →](#)

TECHNOLOGIES

Frontend: HTML5, CSS3, Bulma

Backend / Languages: Java, Python (OOP), SQL

APIs: REST APIs

Data Persistence: JDBC, Hibernate

Databases: SQL, MySQL, SQLite, DBF, MongoDB

Principles and Best Practices: SOLID Principles, Object-Oriented Programming

Version Control and Automation: Git, GitHub, GitHub Actions

Operating Systems: Linux, Windows

IDE / Editors: Visual Studio Code, IntelliJ IDEA, Eclipse, NetBeans, PyCharm

Currently Learning (Full Stack Master's): JavaScript, TypeScript, React, Node.js, Angular, Vue.js

KEY ACHIEVEMENTS

Professional Growth: Joined Proconsi as an IT Technician, delivering application support and maintaining SQL/DBF databases for enterprise business software

Personal Project: Designed and built a Java web application for database management, using JDBC, Hibernate, MySQL, and SQLite

Technical Training: Earned five certifications in under two years (HTML, CSS, SQL, SOLID, Python OOP) while completing two vocational programs and a master's degree

Organization & Commitment: Balanced studies with part-time work for two years and four months without interruption

Customer Service: Resolved customer inquiries and issues across roles at Repsol, Adecco, and Telepizza

LANGUAGES

Spanish: Native

English: B2 — Listening & Reading · B1 — Speaking & Writing
